2007

The "Patrick Chassis" has become the standard for quality, safety and reliability in the monster truck industry. With over 80 trucks built and nearly all of them still in competition today. An impressive roster of customers, builder Dan Patrick is one of the most respected fabricators in the industry. His chassis's carry premier names like Samson, Bigfoot, Grave Digger, Bounty Hunter, Virginia Giant, Predator, Batman, Big Dawg, War Wizard, Equalizer, among many other well known name trucks.

Each Patrick Enterprises monster truck chassis is hand-built in our Circleville, Ohio shop. The original design has been modified and updated to meet the ever increasing stress and abuse that has incurred during today's performances. Your chassis can be built in any stage from a bare tubing basic chassis to a turnkey, race ready monster truck.

Patrick Enterprises, Inc. will build anything from a basic chassis to a complete turn-key truck. We also offer components to fit the needs of even the most demanding drivers.

Customer Testimonials:

"At this time we have 19 Patrick Enterprises chassis. We expect our trucks to reach at least the semi-finals, so we go with Patrick for their dependability and strength. When it comes to freestyle, no one abuses them like our drivers, and they hold up."

*Senior Director of Fleet Operations
Mike Wales - Live Nation Motorsports*

"We use Dan's chassis because of the years of experience he has, the availability of parts and the quality of the craftsmanship."

*2005 Monster Jam World Finals Freestyle
Champion*

Jimmy Creten - 'Bounty Hunter'

"Dan's chassis is the best piece available in the business."

*2 Time Thunder Nationals Series Champion
Diehl Wilson - 'Virginia Giant'*
